I think that school should look like a medium-sized building with a garden around it. Schools should be located in most populated city parts, that makes students easier to reach them. Also, I think that lessons should start later, like 10 AM for example. Also, I think that schools need to teach students about how to find and check information in the internet from first grade. I also think that from 5th grade students need to choose - what are they want to learn deeper. For example: Math and Physics or Language and Literature. Also, according to experience of countries with ^{the} best state of education - usual homeworks shouldn't exist. I think that the most important changes.

First of all, textbooks should be uploaded to the students' phones, because those heavy bags are really difficult always to keep with you. In future we'll need more designers and artists to create all the computer interfaces, so schools ~~we~~ will need more creativity tasks. Now we do the same tasks every day and that is boring and un motivating, in my opinion schools should increase creativity of the students. School programs do really need improvements, most of the time we learn the information we definitely won't need in the future. I think students should be more separated according to their interests, like there should be literature and ^a math classes. I hope future schools will be much enjoyable to go to.

School of future.

WRITING

School of future should be located near the big teleport, so all students could go into it.

Every day school changes its look by future technologies. One day it can be steam-punk, another day, for example, gothic. This way school's look will never annoy students.

Each student can choose subjects he interested in. For example: math, astrology, biology and marsyan language. Every student also should have his own small cabinet, where he will be taught by IT teacher on his computer.

Student can visit school at any time and have so many lessons as he wants, but there must be a number of lessons per week, which student must visit anyway.

Out of the classroom student cant talk with other students or do some sport.

After school student should do small homework and he is free.

Hello, everyone!

It is very important to ask students to describe the way schools should look in the future.

In my opinion school should be like home. Students should get only good emotions there. School should have a lot of sofas because students ~~are~~ tired in school.

Also students should have a normal timetable to have time for facilities and other activities.

And school should have a lot of facilities. For example, basketball, football, painting, playing musical instruments.

If school will look like I described then everything will be good. Because students will want to visit theirs schools.

Thanks for your interview.

Best wishes,

Nastya 104.
